Information Security & Data Classification Policy

Policy ID: IT-SEC-004
Version: 4.1
Effective Date: 15 November 2024
Owner: Information Security Office

Executive Summary

Safeguarding information assets is fundamental to maintaining the trust of Apex Global's clients, regulators, and shareholders. This policy defines the minimum standards for handling, storing, and accessing information in alignment with global security frameworks and regulatory expectations.

Failure to comply with this policy may expose Apex Global to financial, legal, and reputational risk.

1. Purpose

To protect Apex Global information assets from unauthorized access, disclosure, alteration, or destruction.

2. Data Classification Levels

- Public
- Internal
- Confidential
- Restricted

3. Handling Requirements

- Confidential and Restricted data must be encrypted at rest and in transit.
- Restricted data may not be stored on local hard drives.
- Use of personal cloud storage is prohibited.

4. Access Reviews

Managers must review access rights **quarterly**.
